

Press Release METEC & 4th ESTAD 2019

Event announcement METEC & 4th ESTAD 2019 - 24th to 28th June 2019 - Düsseldorf

Steel technologies and applications - achieving success through further development

Düsseldorf, 10 July 2018 - From 24 to 28 June 2019, the VDEh Steel Institute will be organising the 4th ESTAD, Europe's leading conference for the steel industry, to accompany METEC, the world's leading trade fair for metallurgical technology.

In 2019, the 4th European Steel Technology and Application Days (ESTAD) will once again accompany the International Metallurgy Trade Fair (METEC), which will take place for the tenth time. The Steel Institute VDEh is thus sticking to the tradition of accompanying the METEC with a technical conference.

The 4th ESTAD is organized by the Steel Institute VDEh in cooperation with its partners, the Austrian Society for Metallurgy and Materials, Jernkontoret (Sweden) and the Associazione Italiana di Metallurgia. The conference will focus on all technical topics relating to steel, its production and applications, as well as environmental and energy aspects. This gives participants the opportunity to obtain comprehensive first-hand information. The programme for 2019 is divided into five thematic areas:

- Ironmaking
- Steelmaking
- Rolling and forging
- Steel materials and their application, additive manufacturing, surface technologies
- Environmental and energy aspects

Visiting the 4th ESTAD 2019 will again be a must for steel producers, suppliers and users. Detailed information can be found on the conference website: www.metec-estad2019.com

Take part and contribute your know-how to the conference. Registration and the Call for Papers are activated and can be viewed on the website until 30 September 2018.
